

# How do I Backup a Video File to a USB Stick?

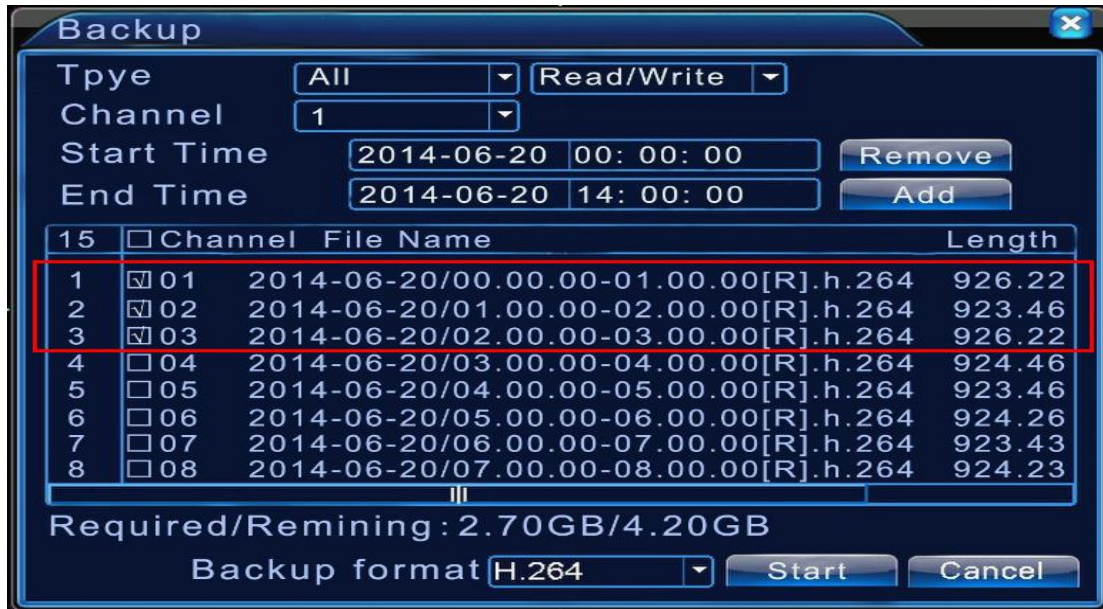

- 1) Connect the USB stick or portable disk USB cable to one of the USB port on the front or back of the DVR
- 2) From the Main Menu, select Record > Backup and select the USB disc drive to backup video from the DVR

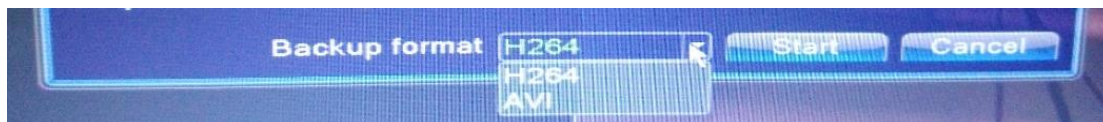

- 4) Click "Backup" to load the Backup interface

4) Select the recording type (default is ALL), camera number or All cameras, start time & end time to search the video files, then click “Add” to display the video files in this time period. Then click in the check box to select the video files required.

5) Select the Backup file format (“H.264” or “AVI”)

6) Select Start to backup the files to your USB drive.
